Objective

A recent B.Sc. Computer Science graduate looking for an entry-level Web Developer role. I know how to build web apps using Python, Flask, and MySQL for backend, and HTML, CSS, and JavaScript for the frontend. I am good at using Git and GitHub to manage code and love solving bugs to build clean websites.

Education

- **Srimad Andavan Arts and Science College, Thiruvanaikovil – 5** **2025 – Present**
M.Sc. cs
- **Srimad Andavan Arts and Science College, Thiruvanaikovil – 5** **2022 – 2025**
B.Sc. cs

Skills

- Web Development: HTML, CSS,
- Programming: Python, Java, JavaScript
- Database: MySQL, MongoDB
- Tools & Software: VS Code, Git, GitHub, Xampp, Postman

Internship

- **Lenovo private limited company, Pondicherry** **16/06 - 30/06**
Assembly line
 - Collaborated within a 21-member cross-functional team to manage high-volume hardware assembly workflows efficiently.
 - Demonstrated strong trouble-shooting skills and adaptability in a fast-paced, process-driven engineering environment.

Projects

- **Automatic Timetable Generator**
 - Built an AI-powered, web-based Progressive Web App (PWA) that automatically generates conflict-free college timetables.
 - Implemented Google OR-Tools (CP-SAT solver), Python (Flask) and Gunicorn for the backend, integrated with a modern HTML5/Vanilla JavaScript frontend.
- **Internship Report Generator**
 - Designed a user-friendly interface that allows students to input details and automatically export structured, standardized reports.
 - Optimized backend data processing to ensure accurate report formatting and reduce manual paperwork for faculty reviewers.

Certificates

- R programming
- ISRO
